

## Shavasana Eyelash Extensions Review

5.17.11

Most women know that long, thick lashes are one of the keys to looking beautiful. We apply mascara and even eyelash extensions to make them look as full as we possibly can.

**Shavasana Eyelash Extensions** have been a trusted name in the eyelash extension business for over 6 years. They are providing the top of the line products along with the training needed to learn to apply eyelash extensions professionally. They not only carry everything an Eyelash Extensionist needs to apply eyelash extensions (if you are looking at becoming an Eyelash Extensionist, **Shavasana Eyelash Extensions** would be a great place to start), but they also carry some products to help us care for our lashes at home.

Here is a description of each of the 3 products I was able to review:

1) **Max2 Eyelash/ Eyebrow Tonic:** (description for box & website) *Max2 Eyelash Tonic Essence is a natural way to create the appearance of longer, thicker eyelashes and eyebrows! Max2 Eyelash Tonic uses the oriental herbs used in alternative medicines in Western countries. The nurturing ingredients in the tonic enhance the durability of your eyelashes and eyebrows. The ingredients used help to stimulate blood circulation around the root of your eyelashes and eyebrows. Increased blood flow helps to activate the root. This will then create the appearance of longer, thicker lashes and brows.*

2) **Shavansana Max2 Special Mascara Gold-Volume Up Extended Eyelash Mascara:** (description from website) *Specially formulated for eyelash extensions, Volume up mascara is gentle enough to wear everyday. Now you can have your extensions and wear mascara too! The nutritional botanicals leave extensions looking softer, thicker and even more dramatic without the damage that other mascara can cause to the extensions. Water-washable, you can literally rinse the extensions with only water to remove the mascara. Volume Up mascara is the finest quality mascara on the market today. Whether for your natural or synthetic lashes, this mascara will give your lashes Volume Up!*

3) **Cucumber & Chamomile Glycol Free and Conditioning Make Up Remover:** (description from bottle) *Specially Formulated for Use With Your Shavasana Lash Extensions. A gentle oil-free, botanical based eye makeup remover that soothes as it removes makeup and residue from your lashes. Safe for Contact Lens wearers. Nourishing as it gently cleanses. Oil-free, aqueous solution leaves skin feeling clean. May be used on entire face if desired.*

I, personally, do not have lash extensions, not that I would not like to have them but I just do not have them at this time, so I cannot speak for how they work with extensions. However, since these 3 products can be used on natural eyelashes as well. I did try them that way. I must say that I like how they work for me. I have only been using the tonic for a little over a week so far but it seems like it is helping the appearance of my lashes.

The look of your lashes can make a huge impact on your appearance. **Shavasana Eyelash Extensions** may be the place to help you make the most of your lashes!
